

Install Ballerina 0.990.0

1. Go to <https://ballerina.io>
2. Click on the Download box:

3. Click on the Linux Box:

4. When the download has finished, install the .deb:

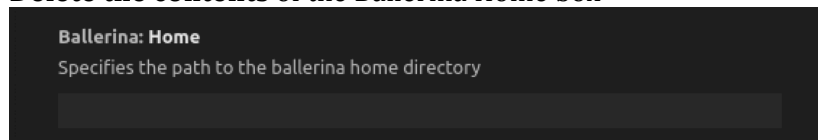

```
sudo apt update
sudo apt upgrade -y
sudo dpkg -i ~/Downloads/ballerina-linux-installer-x64-0.990.0.deb
```

5. Validate that you have it installed properly:

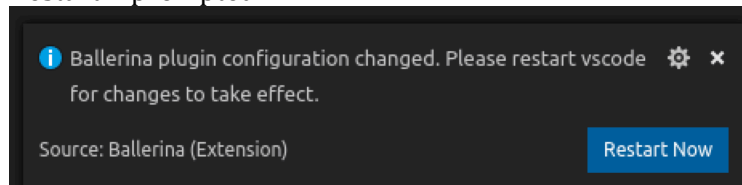

```
$ ballerina version
Ballerina 0.990.0
```

6. Unfortunately we have some config from a previous installation that needs removing before we can use Ballerina.

- a. Open vscode
- b. Hit Ctrl+, to edit settings
- c. Type ballerina into the search bar
- d. **Delete the contents** of the Ballerina Home box

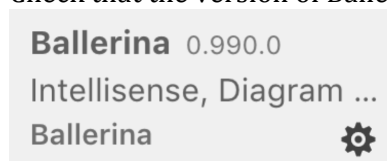

- e. Restart if prompted

- f. **Command Palette -> Show Installed Extensions**

- g. Check that the version of Ballerina is 0.990.0

That's all!
