Fix to exercise 4

edit build.gradle to include (in dependencies)

```
implementation('org.glassfish.jersey.connectors:jersey-apache-connector')
```

Then go to:

https://freo.me/soa-ex4-fix

Replace the contents of PurchaseApplicationTests.java with this code instead.

Start a mitmdump on port 8000 (NOT IN REVERSE MODE)

```
mitmdump --listen-port 8000 --set flow_detail=3
```

OR DISABLE the proxy in the tests by changing:
```
    private static final String PROXY_URI = "http://localhost:8000";
    // private static final String PROXY_URI = null;
```

to

```
    // private static final String PROXY_URI = "http://localhost:8000";
    private static final String PROXY_URI = null;
```

Rebuild.
